

Dear LEADconnection® member,

We've reached some milestones since our launch 2 years ago:

- Total visits to the website now exceed 66,000
- Views of the cases are now >22,000

Speaking of cases, congratulations to Dr. Jussi Niiranen, whose case has generated the most views to date, and kudos to Dr. George Crossley, who has 3 cases among the top 10! Here are the top 10 most-viewed cases:

Case	Author	Views (n)
<i>LV-lead in PLSVC</i>	Dr. Jussi Niiranen	3,987
<i>Lead endocarditis or not?</i>	Dr. Frank Bracke	1,778
<i>RV Lead Perforation – How to Extract?</i>	Dr. Robert Schaller	1,622
<i>How Old is Too Old</i>	Dr. George Crossley	1,397
<i>A Mess!</i>	Dr. George Crossley	1,374
<i>Indication for PPM</i>	Dr. Faisal Qadir	1,123
<i>LV lead body prolapse into the RVOT in a patient with SVC occlusion</i>	LEADconnection	1,067
<i>Lead erosion</i>	Dr. Nguyen Van Dang	1,014
<i>Tricuspid Stenosis from Pacing Lead</i>	Dr. Bruce Wilkoff	1,005
<i>Lymphedema After Lead Problems</i>	Dr. George Crossley	965

We're planning an exciting new initiative, the LEADconnection Educational Case Series, chaired by Dr. Robert Schaller (UPenn), where members will create ~10-minute narrated slide decks of interesting, difficult, and important lead management cases to share with their colleagues. We hope you will consider contributing such a case, and we've created a [slide template](#) for your use. We're happy to help with the narration process. Send your questions, suggestions, and slides to our new email address: Education@leadconnection.org.

While most of our visitors are from the United States, we also enjoy visits from the United Kingdom, Australia, Italy, Brazil, China, Germany, and many other countries. If you haven't already, please update your [profile](#) to let us know which country you represent.

As always, we encourage you to invite your colleagues to join the LEADconnection community.
